ABOUT THE CONFERENCE

The National Conference on Digital Transformation, Innovation & Global Perspectives (NCDTIGP–2026) aims to provide a multidisciplinary platform for researchers, academicians, industry professionals, entrepreneurs, educators, students and innovators to share research findings, emerging ideas and practical solutions addressing the rapidly changing technological and socio-economic landscape. The conference focuses on the role of digital transformation, emerging technologies, innovation, management, education, humanities, social sciences, entrepreneurship and sustainable development in shaping the future. The conference will encourage interdisciplinary dialogue and collaboration among diverse academic and professional communities. It will provide opportunities to present research papers, exchange knowledge, interact with experts and explore new avenues for research and collaboration.
